ICC Code Connect™ API

ICC Code Connect™ API is a seamless solution for *Integrating ICC Code Content directly with your organizations existing workflow application.*

How ICC Code Connect™ API Works:

ICC Code Connect™ API establishes a direct connection to ICC's codes and standards from within an organization's workflow tool:

Search and import the latest codes within your building code software

Streamline common code references within your portal or workflow tool

Quickly copy and paste code content into correction letters and other review documents

Avoid mistakes when capturing code citations manually from outdated print or PDF files

Automatically link a section reference to the complete section text

Integrate content directly onto the screens your team works

Content Licensing Pricing

ICC provides annual subscription price for access to code contents by title

- Jurisdiction cost determined by population and quantity of titles
- Vendor/Company cost determined by employee size and quantity of titles
- Allow clients to utilize existing content license key across multiple vendors
- Additional content offerings added to ICC Code Connect™ API upon market interest
- eCode360 API available for jurisdictions with eCode360 instance

For customized pricing, contact Phil Anthony at panthony@iccsafe.org
